

Codex Quick Start Guide

Congratulations on your purchase of the Codex. We know you are anxious to listen to the Codex, so below are the important steps to take in order to get it setup and running as quickly as possible.

Please read the Owner's manual to learn how to access the setup menu and complete details of Codex operation.

Windows USB setup

- 1) Plug in and power on the Codex using the switch on the back of the unit.
- 2) Connect it to your computer via the included USB cable.
- 3) Install the Streamlength driver from the included disc or download it from the Ayre website (http://www.ayre.com/usb_driver.htm)
- 4) Connect your 3.5mm headphone* to either port 1 or 2, or 1/4" headphone to the 1/4" connector. For balanced headphone operation or using two 3.5mm headphones simultaneously, please refer to the owner's manual.
- 5) Open your preferred music player make any necessary audio output selections and enjoy!

Apple USB setup

- 1) Plug in and power on the Codex using the switch on the back of the unit.
- 2) Connect it to your computer via the included USB cable.
- 3) Select "Ayre USB interface" as your sound output device in System Preferences > Sound > Output.
- 4) Connect your 3.5mm headphone* to either port 1 or 2, or 1/4" headphone to the 1/4" connector. For balanced headphone operation or using two 3.5mm headphones simultaneously, please refer to the owner's manual.
- 5) Open your preferred music player and enjoy!

*Caution, only use 3.5mm plugs with 2 rings. 3 ring and 1 ring plugs will not work properly.
